Disclaimer

THE INFORMATION CONTAINED IN THIS WHITE PAPER IS BEING MADE AVAILABLE IN CONNECTION WITH THE PRESENTATION OF THE ABYSS TOKEN PROJECT TO POTENTIAL TOKEN HOLDERS. THE INFORMATION SET FORTH BELOW MAY NOT BE EXHAUSTIVE AND DOES NOT IMPLY ANY ELEMENTS OF A CONTRACTUAL RELATIONSHIP. ITS SOLE PURPOSE IS TO PROVIDE RELEVANT AND REASONABLE INFORMATION TO POTENTIAL TOKEN HOLDERS FOR THEM TO DETERMINE WHETHER TO UNDERTAKE A THOROUGH ANALYSIS WITH THE INTENT OF CONTRIBUTING AND GETTING ABYSS TOKENS.

NO BROKER, DEALER, SALESMAN OR OTHER PERSON HAS BEEN AUTHORISED BY THE COMPANY OR ITS DIRECTORS TO ISSUE ANY ADVERTISEMENT OR TO GIVE ANY INFORMATION OR TO MAKE ANY REPRESENTATIONS IN CONNECTION WITH THE COMPANY OTHER THAN THOSE CONTAINED IN THIS WHITE PAPER AND OTHER DOCUMENTS REFERRED TO HEREIN, AND IF GIVEN OR MADE, SUCH INFORMATION OR REPRESENTATIONS MUST NOT BE RELIED UPON AS HAVING BEEN AUTHORISED BY THE COMPANY.

THIS WHITE PAPER DOES NOT CONSTITUTE, AND MAY NOT BE USED FOR THE PURPOSES OF, AN OFFER OR INVITATION TO PURCHASE ABYSS TOKENS ISSUED BY THE COMPANY BY ANY PERSON IN ANY JURISDICTION: (I) IN WHICH SUCH OFFER OR INVITATION IS NOT AUTHORISED; OR (II) IN WHICH THE PERSON MAKING SUCH OFFER OR INVITATION IS NOT QUALIFIED TO DO SO, OR (III) TO ANY PERSON TO WHOM IT IS UNLAWFUL TO MAKE SUCH OFFER OR INVITATION. THE DISTRIBUTION OF THIS WHITE PAPER IN CERTAIN JURISDICTIONS MAY BE RESTRICTED AND, ACCORDINGLY, PERSONS INTO WHOSE POSSESSION IT IS RECEIVED ARE REQUIRED TO INFORM THEMSELVES ABOUT, AND TO OBSERVE, SUCH RESTRICTIONS.

THIS WHITE PAPER AND THE OFFERING, SALE OR DELIVERY OF ANY ABYSS TOKENS MAY NOT BE CONSTRUED AS IMPLYING: (I) THAT THE INFORMATION CONTAINED IN THIS WHITE PAPER IS ACCURATE AND COMPLETE SUBSEQUENT TO ITS DATE OF ISSUE; OR (II) THAT THERE HAS BEEN NO MATERIAL ADVERSE CHANGE IN THE FINANCIAL POSITION OF THE COMPANY SINCE SUCH DATE; OR (III) THAT ANY OTHER INFORMATION SUPPLIED IN CONNECTION WITH THE WHITE PAPER IS ACCURATE AT ANY TIME SUBSEQUENT TO THE DATE ON WHICH IT IS PUBLISHED, OR, IF DIFFERENT, THE DATE INDICATED IN THIS WHITE PAPER.

PURCHASE OF ABYSS TOKENS MAY PUT A CONTRIBUTOR'S CASH PARTLY OR WHOLLY AT RISK. CONTRIBUTORS SHOULD THUS SEEK APPROPRIATE ADVICE AND READ ALL THE INFORMATION CONTAINED IN THIS WHITE PAPER BEFORE MAKING ANY DECISION. A PROSPECTIVE CONTRIBUTOR SHOULD ALWAYS SEEK INDEPENDENT ADVICE BEFORE DECIDING TO CONTRIBUTE TOWARDS ANY PROJECT OF THIS NATURE. A PROSPECTIVE CONTRIBUTORS SHOULD BE AWARE OF THE POTENTIAL RISKS IN MAKING HIS/HER

CONTRIBUTION AND SHOULD MAKE THE DECISION TO CONTRIBUTE ONLY AFTER CAREFUL CONSIDERATION AND CONSULTATION WITH HIS OR HER OWN INDEPENDENT ADVISORS AS TO ANY MATTER CONCERNING THE ABYSS TOKENS, THE COMPANY, AND THIS WHITE PAPER.

IT IS THE RESPONSIBILITY OF ANY PERSON IN POSSESSION OF THIS DOCUMENT TO INFORM THEMSELVES OF, AND TO OBSERVE AND COMPLY WITH, ALL APPLICABLE LAWS AND REGULATIONS OF ANY RELEVANT JURISDICTION. PROSPECTIVE CONTRIBUTORS SHOULD INFORM THEMSELVES AS TO THE LEGAL REQUIREMENTS OF APPLYING FOR ANY SUCH TOKEN AND ANY EXCHANGE CONTROL REQUIREMENTS AND TAXES IN THE COUNTRIES OF THEIR NATIONALITY, RESIDENCE OR DOMICILE.

SAVE FOR THE INITIAL COIN OFFER IN MALTA, NO ACTION HAS BEEN OR WILL BE TAKEN BY THE ISSUER THAT WOULD PERMIT A PUBLIC OFFERING OF THE TOKENS OR THE DISTRIBUTION OF THE WHITE PAPER (OR ANY PART THEREOF) OR ANY RELATED MATERIAL IN ANY COUNTRY OR JURISDICTION WHERE ACTION FOR THAT PURPOSE IS REQUIRED.

STATEMENTS MADE IN THIS WHITE PAPER ARE, EXCEPT WHERE OTHERWISE STATED, BASED ON THE LAW AND PRACTICE CURRENTLY IN FORCE IN MALTA AND ARE SUBJECT TO CHANGES THEREIN.

ALL ADVISORS TO THE COMPANY HAVE ACTED AND ARE ACTING EXCLUSIVELY FOR THE COMPANY IN RELATION TO THE ABYSS TOKENS AND HAVE NO CONTRACTUAL, FIDUCIARY OR OTHER OBLIGATION OR RESPONSIBILITY TOWARDS ANY OTHER PERSON AND WILL, ACCORDINGLY, NOT BE RESPONSIBLE TO ANY CONTRIBUTOR OR ANY OTHER PERSON WHOMSOEVER IN RELATION TO THE TRANSACTIONS PROPOSED IN THIS WHITE PAPER, NEITHER SHALL SUCH ADVISORS BE RESPONSIBLE FOR THE CONTENTS OF, AND ANY INFORMATION CONTAINED IN THIS WHITE PAPER, ITS COMPLETENESS OR ACCURACY OR ANY OTHER STATEMENT MADE IN CONNECTION THEREWITH.

UNLESS OTHERWISE STATED, THE CONTENTS OF THE COMPANY'S WEBSITE DIRECTLY OR OTHER WEBSITES INDIRECTLY LINKED TO THE COMPANY'S WEBSITE DO NOT FORM PART OF THIS WHITE PAPER. ACCORDINGLY NO RELIANCE OUGHT TO BE MADE BY A CONTRIBUTOR ON ANY INFORMATION OR OTHER DATA CONTAINED IN SUCH WEBSITES AS THE BASIS FOR A DECISION TO CONTRIBUTE TOWARDS THE ABYSS PROJECT.

NEITHER THIS WHITE PAPER NOR ANY OTHER INFORMATION SUPPLIED HEREIN IN CONNECTION WITH THE ABYSS TOKENS (I) IS INTENDED TO PROVIDE THE BASIS OF ANY CREDIT OR OTHER EVALUATION, NOR (II) SHOULD BE CONSIDERED AS A RECOMMENDATION BY THE COMPANY THAT ANY RECIPIENT OF THIS WHITE PAPER, OR ANY OTHER INFORMATION SUPPLIED IN CONNECTION THEREWITH, SHOULD PURCHASE ANY TOKENS ISSUED BY THE COMPANY. ACCORDINGLY, PROSPECTIVE CONTRIBUTORS SHOULD MAKE THEIR OWN INDEPENDENT EVALUATION OF ALL RISK FACTORS.

THIS DOCUMENT CONTAINS STATEMENTS THAT ARE, OR MAY BE DEEMED TO BE, “FORWARD-LOOKING STATEMENTS”. THERE FOREWARD-LOOKING STATEMENT CAN BE IDENTIFIED BY THE USE OF FORWARD-LOOKING TERMINOLOGY INCLUDING THE TERMS “BELIEVES”, “ESTIMATES”, “ANTICIPATES”, “EXPECTS”, “INTENDS”, “MAY”, “WILL” OR “SHOULD” OR, IN EACH CASE, THEIR NEGATIVE OR OTHER VARIATIONS OR COMPARABLE TERMINOLOGY. THESE FORWARD-LOOKING STATEMENTS RELATE TO MATTERS THAT ARE NOT HISTORICAL FACTS. THEY APPEAR IN A NUMBER OF PLACES THROUGHOUT THIS DOCUMENT AND INCLUDE STATEMENTS REGARDING THE INTENTIONS, BELIEFS, OR CURRENT EXPECTATIONS OF THE COMPANY AND ITS DIRECTORS CONCERNING, AMONGST OTHER THINGS, THE COMPANY’S STRATEGY AND BUSINESS PLAN, RESULTS OF OPERATIONS, FINANCIAL CONDITION, LIQUIDITY AND PROSPECTS OF THE COMPANY AND THE MARKETS IN WHICH IT OPERATES.

BY THEIR NATURE, FORWARD-LOOKING STATEMENTS INVOLVE RISKS AND UNCERTAINTIES BECAUSE THEY RELATE TO EVENTS AND DEPEND ON CIRCUMSTANCES THAT MAY OR MAY NOT OCCUR IN THE FUTURE. FORWARD-LOOKING STATEMENTS ARE NOT GUARANTEES OF FUTURE PERFORMANCE AND SHOULD THEREFORE NOT BE CONSTRUED AS SUCH. THE ACTUAL RESULTS OF OPERATIONS, FINANCIAL CONDITION, LIQUIDITY, AND THE STRATEGIC DEVELOPMENT OF THE COMPANY MAY DIFFER MATERIALLY FROM THE FORWARD-LOOKING STATEMENTS CONTAINED IN THIS WHITE PAPER. IN ADDITION, EVEN IF THE RESULTS OF OPERATIONS, FINANCIAL CONDITION AND LIQUIDITY OF THE COMPANY ARE CONSISTENT WITH THE FORWARD-LOOKING STATEMENTS CONTAINED IN THIS WHITE PAPER, THOSE RESULTS OR DEVELOPMENTS MAY NOT BE INDICATIVE OF RESULTS OR DEVELOPMENTS IN SUBSEQUENT PERIODS.

THIS DOCUMENT IS NOT COMPOSED IN ACCORDANCE WITH, AND IS NOT SUBJECT TO, LAWS OR REGULATIONS OF ANY JURISDICTION WHICH ARE DESIGNED TO PROTECT INVESTORS.

THIS ENGLISH LANGUAGE WHITE PAPER IS THE PRIMARY OFFICIAL SOURCE OF INFORMATION ABOUT THE ABYSS TOKEN SALE. THE INFORMATION CONTAINED HEREIN MAY FROM TIME TO TIME BE TRANSLATED INTO OTHER LANGUAGES OR USED DURING WRITTEN OR VERBAL COMMUNICATIONS WITH EXISTING AND PROSPECTIVE CUSTOMERS, PARTNERS, ETC. BECAUSE OF THIS TRANSLATION OR COMMUNICATION SOME OF THE INFORMATION CONTAINED HEREIN MAY BE LOST, CORRUPTED, OR MISREPRESENTED. THE ACCURACY OF SUCH ALTERNATIVE COMMUNICATIONS CANNOT BE GUARANTEED. IN THE EVENT OF ANY CONFLICTS OR INCONSISTENCIES BETWEEN SUCH TRANSLATIONS AND COMMUNICATIONS AND THIS OFFICIAL ENGLISH LANGUAGE WHITE PAPER, THE PROVISIONS OF THIS ENGLISH LANGUAGE ORIGINAL DOCUMENT SHALL PREVAIL. THE ABYSS DOES NOT ALLOW USERS TO AVOID CAPITAL CONTROLS OF ANY KIND AND DOES NOT ALLOW THEM TO INVEST.

THE OFFERING OF ABYSS TOKENS ON THE ABYSS PLATFORM IS DONE TO ALLOW THE USE OF THE ABYSS SERVICES AND PLATFORM AND NOT FOR INVESTMENT OR SPECULATIVE PURPOSES. THE POTENTIAL OFFERING OF ABYSS TOKENS ON A TRADING PLATFORM WOULD NOT CHANGE THE LEGAL QUALIFICATION OF THE TOKENS THAT REMAIN A MEANS FOR THE USE OF THE ABYSS GAMING PLATFORM AND ARE NOT A FINANCIAL INSTRUMENT OR ANY OTHER FORM OF INVESTMENT OF A FINANCIAL NATURE IN ANY JURISDICTION. THE ABYSS IS NOT TO BE CONSIDERED AS AN ADVISOR IN ANY LEGAL, TAX OR FINANCIAL MATTERS. ANY INFORMATION IN THE WHITE PAPER IS PROVIDED FOR GENERAL INFORMATION PURPOSES ONLY AND THE ABYSS DOES NOT PROVIDE ANY WARRANTY AS TO THE ACCURACY AND COMPLETENESS OF THIS INFORMATION.

REGULATORY AUTHORITIES ARE CAREFULLY SCRUTINIZING BUSINESSES AND OPERATIONS ASSOCIATED TO CRYPTOCURRENCIES IN THE WORLD. IN THAT RESPECT, REGULATORY MEASURES, INVESTIGATIONS OR ACTIONS MAY IMPACT THE ABYSS' BUSINESS AND EVEN LIMIT OR PREVENT IT FROM DEVELOPING ITS OPERATIONS IN THE FUTURE. ANY PERSON UNDERTAKING TO HOLD ABYSS TOKENS MUST BE AWARE OF THE ABYSS MODEL, THE WHITE PAPER OR TERMS AND CONDITIONS MAY CHANGE OR NEED TO BE MODIFIED BECAUSE OF NEW REGULATORY AND COMPLIANCE REQUIREMENTS FROM ANY APPLICABLE LAWS IN ANY JURISDICTIONS. IN SUCH A CASE, CONTRIBUTORS AND ANYONE UNDERTAKING TO HOLD ABYSS TOKENS ACKNOWLEDGE AND UNDERSTAND THAT NEITHER THE ABYSS NOR ANY OF ITS AFFILIATES SHALL BE HELD LIABLE FOR ANY DIRECT OR INDIRECT LOSS OR DAMAGE CAUSED BY SUCH CHANGES. THE ABYSS WILL DO ITS UTMOST TO LAUNCH ITS OPERATIONS AND DEVELOP THE ABYSS PLATFORM. ANYONE UNDERTAKING TO ACQUIRE ABYSS TOKENS ACKNOWLEDGES AND UNDERSTANDS THAT THE ABYSS DOES NOT PROVIDE ANY GUARANTEE THAT IT WILL MANAGE TO ACHIEVE SUCH RESULTS. CONTRIBUTORS ACKNOWLEDGE AND UNDERSTAND THEREFORE THAT THE ABYSS (INCLUDING ITS MANAGEMENT BODIES AND EMPLOYEES, CONSULTANTS AND ADVISORS) ASSUMES NO LIABILITY OR RESPONSIBILITY FOR ANY LOSS OR DAMAGE THAT WOULD RESULT FROM OR RELATE TO THE INCAPACITY TO USE ABYSS TOKENS, EXCEPT IN CASE OF INTENTIONAL MISCONDUCT OR GROSS NEGLIGENCE.

EVERY ABYSS TOKEN HOLDER SHOULD CONSIDER GETTING HOLD OF ONLY THE NUMBER OF TOKENS THAT HE/SHE THINKS SHOULD BE SUFFICIENT TO ACCESS (ON THE ABYSS PLATFORM) THE SERVICES HE/SHE REQUIRES AND CAN USE DIRECTLY. EVEN IF THE ABYSS WILL BE COMMITTED TO ALLOW THE TOKEN TO BE TRADED ON EXTERNAL EXCHANGES, THOSE EXCHANGES ARE THIRD-PARTIES THAT MAY CHOOSE TO NEVER LIST THE ABYSS TOKEN. THIS MEANS THAT THERE IS NO WARRANTY THAT THE ABYSS TOKEN WILL BE TRADABLE, AND THUS, THERE IS NO WARRANTY THAT ABYSS TOKEN HOLDERS WILL BE ABLE TO SELL ANY ABYSS TOKEN SURPLUS THEY DO NOT NEED. FURTHERMORE, EVEN IN CASE THE ABYSS TOKENS COULD BE SOLD, THERE IS NO WARRANTY THAT THE OFFERED PRICE

WILL NOT BE LOWER THAN THE INITIAL COIN OFFERING PRICE, GENERATING LOSSES FOR THE ABYSS TOKEN HOLDER.

SINCE HOLDING ABYSS TOKENS IS NOT ASSOCIATED WITH ANY INVESTMENT, THERE IS NO LINK BETWEEN THE PROFITABILITY OF THE ABYSS PLATFORM AND THE VALUE THAT THE ABYSS TOKEN MAY HYPOTHETICALLY REACH ON THIRD PARTY EXCHANGES, SHOULD SUCH EXCHANGES DECIDE TO LIST THE ABYSS TOKEN. FURTHERMORE, IN CASE OF PROJECT FAILURE, THE ABYSS MAY BE UNABLE TO PROVIDE THE PLATFORM SERVICES TO TOKEN HOLDERS.

THE ABYSS CANNOT BE HELD RESPONSIBLE FOR LOSSES DUE TO THE FOLLOWING OR ANY OTHER SITUATION: E.G., IMPOSSIBILITY FOR TOKEN HOLDERS TO SELL THEIR ABYSS TOKENS; THE CASE IN WHICH NO EXCHANGE CHOOSES TO LIST THE ABYSS TOKENS; LOSSES DUE TO SALE OF ABYSS TOKENS AT A LOWER PRICE THAN THE PRICE PAID; FAILURE OF THE PROJECT AND CLOSURE OF THE PLATFORM WITH THE IMPOSSIBILITY TO USE THE SERVICES.

THE ABYSS NAME, THE WEBSITE, THE ABYSS SOCIAL MEDIA ACCOUNTS ARE THE SOLE PROPERTY OF THE ABYSS LTD, A COMPANY LAWFULLY INCORPORATED AND REGISTERED UNDER THE LAWS OF MALTA.

Abstract

We have reached a point in the digital era, where there is no lack of game options. Whether played on a personal computer, video game console, mobile phone, tablet or even a watch, video games are accessible at absolutely any time. Over the past three decades we have witnessed the unprecedented development of video game industry, from plastic boxes with black-and-white Tetris to virtual reality helmets. Video games initially challenged other forms of entertainment; now they are the definitive leader.

It would seem that the biggest headache for video game developers should be creating content and an interesting product. In fact, the hardest part is finding a way to make the product stand out among the masses of other video game options and reach the end user. Advertising expenditures often account for more than half of the budget for video game development. The cost of traffic has steadily increased with the rise of the offers on the market. But what amount of advertising expenses is really effective?

The emergence of blockchain technology¹ has enabled the creation of a next-generation digital distribution platform, delivering all types of video games (Free2play MMOs and cryptogames² being a key priority), including AAA-titles, to the fast-growing global game community. Unlike other platforms (Steam, Origin, GOG, etc.), The Abyss platform offers a groundbreaking motivational and referral system, allowing gamers to earn from in-game and social activities, and other gamers' payments as well. By utilising The Abyss platform, developers will reduce their marketing expenses and receive an extra income from referral payments made in other games on the platform. Other benefits would include automatic referral fees payable directly into cryptocurrency accounts, the internal CPA Network³, etc.

¹Blockchain, a form of digital ledger technology, is a digital or electronic database/ledger that is distributed, decentralised, shared and replicated. It may be public or private, permitted or permissionless, is immutable, cryptographically protected and is auditable.

²<https://techcrunch.com/2017/12/03/people-have-spent-over-1m-buying-virtual-cats-on-the-ethereum-blockchain/>

³Cost per action is an online advertising pricing model where the advertiser pays for a specified acquisition - for example a sale, click, or form submit (e.g., contact request, newsletter sign up, registration etc.).

1 The Market in which The Abyss operates

In 2017, the video game industry exceeded an income level of \$100 billion dollars. The market size is currently around \$104.6 billion. It has expanded 12% so far this year, and by 2020 is expected⁴ to increase by 60-80% to reach an income of \$168.8 billion.

Worldwide Games and Interactive Media Revenue

1.1 MMO (Massively Multiplayer Online) Games

SuperData predicts that the segment of massively multiplayer online (MMO) games expanded 13% in 2016 with the number of active users reaching 879 million, primarily regarding F2P games. The Abyss platform aims to make MMO games a priority thereby projecting a correlated increase in users.

Source: SuperData

MMO games for personal computers (PC) confidently lead in all indicators among games of various genres. MMO games accounted for 60% of the profits of all PC games in 2016.

According to NewZoo report⁵, worldwide incomes from multiplayer online projects will continue to rise significantly.

MMOs earn \$19,8B in 2016E, 60% of all digital PC game revenue

Asia wins out thanks to audience numbers, but North America and Europe have higher conversion and average spending

2 Current Digital Distribution Platforms

Digital distribution platforms are successfully developing on the video game market today. According to information from open sources, it is possible to note a global trend of increasing audiences and incomes of the platforms.

Platform	Developer	Information From Open Sources
STEAM	Valve	General earnings amounted to \$3.5 billion ⁶ in 2016.
ORIGIN	Electronic Arts	The platform contributed to EA's digital net revenue in 2016, which increased to \$2,9 bln ⁷ .
UPLAY	Ubisoft	Earned €729 million ⁸ from digital distribution, amounting to slightly more than half of all incomes of the company. Over the previous year, this indicator equaled 32%.
KONGREGATE	Gamestop Corporation/MTG	The platform expects annual profits of \$50 million for 2017. Acquired by MTG in 2017 ⁹ .
GOG	CD Projekt	Profit in 2016 reached \$38 million ¹⁰ .

It stands to reason that, in order to maximize the audience reach, developers aim to distribute their projects across a various digital distribution platforms. When choosing a game, users tend to opt for services with the most convenient functions and additional possibilities. A good example is The Witcher 3, which is presented on both STEAM and GOG.

3 Time for a New Platform

Today time has come to think about a new game environment. Current platforms are cumbersome and sluggish in terms of interacting with developers. Advertising options are either inexistent, or too expensive and ineffective. Usually the promotion of games on platforms is limited by the choice of platform where the game is distributed whilst inter-platform promotion remains a fund-intensive venture. Motivational programs for users are limited by the share of payments from other users they bring in, in the best case, or more often by their place in the ranking.

3.1 The Abyss as a Next-Generation Digital Distribution Platform

The Abyss aims at developing a next generation digital distribution platform, delivering all types of video games (Free2play MMOs and cryptogames being a key priority), including AAA-titles, to the fast-growing global game community. The Abyss platform offers a groundbreaking motivational and referral system, allowing gamers to earn from in-game and social activities, and other gamers' payments as well. By utilizing the Abyss platform, developers will reduce their marketing expenses and receive an extra income from referral payments made in other games on the platform.

ABYSS tokens are a priority internal mechanism for interaction on the platform (ERC20 standard on the Ethereum blockchain). Our game platform will be available for Desktop (Windows, MacOS, Linux), Mobile (iOS and Android) and Web.

3.2 Key Characteristics and anticipated benefits of the Project:

- A powerful referral program whereby a user brought in by a developer provides the developer an amount of ABYSS tokens from all payments and achievements in any other game on the platform.
- An analogous referral system is built on a viral basis whereby players receive referral ABYSS tokens from their invited friends' transactions (actual sales on the platform). ABYSS tokens can also be accumulated by the player through various different activities on the platform (achievements, content generation, internal CPA Network, etc.).

The Abyss utilizes the principle of affiliate marketing: a maximal income is obtained by players and developers who are the first to bring in users to the platform. The system is oriented at more effectively inviting and retaining users than any other in the video game sphere.

- **Low entry threshold for the first check:** dual currency options whereby all operations can be conducted in fiat money and the platform's own ABYSS tokens.

- **Convenience of using tokens:** tokens can be transferred to cryptocurrency accounts both manually and automatically.
- **Saving money on marketing:** an internal system of advertising offers (based on ABYSS tokens) enables traffic to be exchanged with other developers, receiving and passing along only relevant users.
- **Gamification of Masternodes service:** a well-planned system of syndicates.

3.3 The Abyss's Advantages for Developers

The Abyss platform offers a fundamentally different logic of advertising interaction to the developers. By directly buying and selling targeted traffic to each other and receiving payments even from users leaving the game, developers become a sort of partners. The model for interaction is thus altered from being competitive to being collaborative and mutually beneficial. It provides an ability to reduce expenses on being competitive and accordingly entails potential income growth for developers.

- Payments are accepted in ABYSS tokens as well as fiat money;
- The minimum share of payments by users of the platform for developers is 70%;
- Referral programs can bring a developer's share to more than 100% in overall terms;
- Developers can receive payments in tokens without verifying documents or waiting until the end of a reporting period;
- The developer can fully receive his share in fiats, regardless of the currency in which the initial payment was received by the platform;
- Developers immediately at the start get access to a targeted audience, including those generating content;
- Developers get access to specialized player statistics;
- Developers are offered a 24/7 customer support service;
- Developers define the depth of support service' integration into their projects (three levels of integration are available);
- Developers are offered a convenient and understandable mechanism for rotating traffic among any games on the platform via an internal system of advertising offers;

- Developers are offered a simple mechanism for getting traffic both within and outside the platform;
- No fraud and fewer refunds in operations with ABYSS tokens compared with those using fiat money;
- An opportunity to launch projects as an alfa or beta version for gathering opinions, testing and figuring out what aspects require the most work to improve the game, particularly regarding content and monetization;
- An exhaustive amount of information, including user feedback and media reviews, is presented to aid in promoting the game and protecting it from unfair competition;
- Users are unable to delete negative comments that contain a falsehood or are otherwise libelous following an official reply by a developer in which the situation is explained;
- Open guidelines for free game promotion within the platform, including a banner on the main page, a slot in pop-up windows when a client opens the platform, project evaluations and other marketing solutions on the platform.

3.4 The Abyss's Advantages for Players

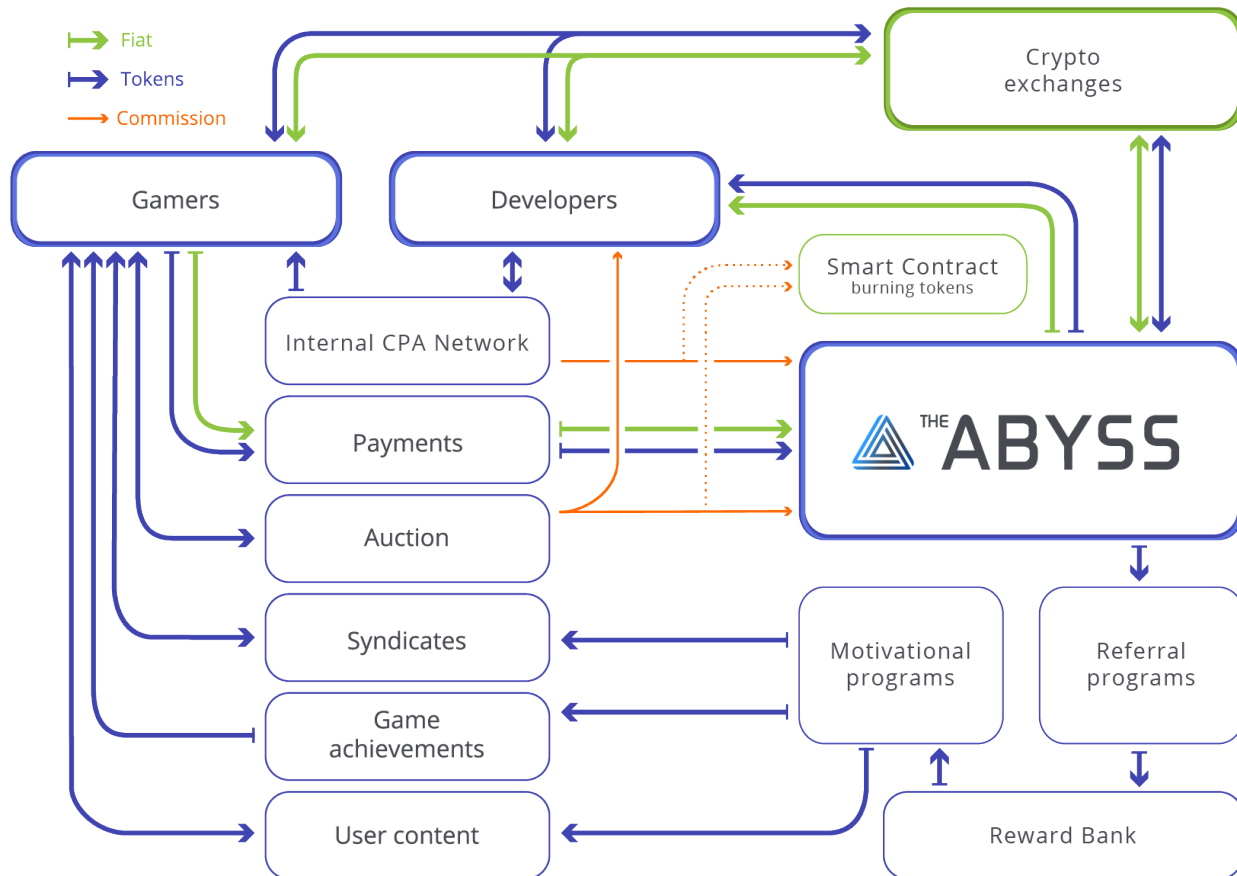

The Abyss platform offers a wide range of profitable options for players, such as referral rewards, rewards for game achievements and payments for creating content.

- Players get worldwide access to numerous games in one place;
- Players are offered individual referral programs in which an income (paid in ABYSS tokens) is calculated based on a five-level referral chain comprised of friends brought in and users brought in by friends;
- ABYSS tokens rewards from personal or joint game achievements;
- Monetization of content created (reviews, streams, guides, commentary, fan art);
- Additional ABYSS tokens income at an internal auction;
- Players can earn additional ABYSS token rewards by fulfilling tasks within the system of offers for developers;
- Beyond the framework of a given game, users are able to form syndicates and earn additional ABYSS token rewards from collaborative activities;
- On demand, ABYSS tokens are transferred to the personal Ethereum wallet;

- There is an internal overlay for in-game communication with any user of the platform and a fast access to important functions;
- An overview of the activities of friends on the portal, including game achievements, sessions and other information. The user privacy settings can be adjusted individually;
- A comprehensive, individual system of client settings for each user to see only what is needed;
- FPS counter is used to obtain information on game performance for PC users;
- Analysis of the frequency of achievements influencing the value of rewards for users and their ratings;
- Automatic updates of games enable players not to care about how current a version is, while the ability to limit download speeds of needed files will be convenient for users with a slow internet connection. Regarding these options, it is possible to set a schedule or simply turn off the automatic update regime;
- A hibernation regime enables computer resources to be freed up when clients are working in a background regime or when users are in the game;
- An "out of network" regime enables players to maintain access to some of the platform's functions even if there is no internet connection;
- During game sessions, users are able to get data about all players with whom they are interacting during game play so that they can make their acquaintance and become friends;
- Screenshots and video captures of game process enable publication of any moment important to a particular player. The user can adjust the quality of the screenshots and video, as well as hotkeys and the location for saving the data with dates and times of the process saved;
- An opportunity to organize computers in a virtual local network even if they are physically distant (in different towns, countries or even continents). This enables game play with friends for whom the official game servers either do not work or are inaccessible;
- Convenient search engine for finding and adding friends, according to their unique ID, nickname, email address or any other parameter.

4 Platform Structure and Basic Services

The Abyss is a comprehensive ecosystem, consisting of mutually-referenced elements.

Unified Authentication. The functionality of a unified system of authentication (including social networks) enables users to easily connect to the platform and get access to all the opportunities offered by the service. Two-factor authentication and the possibility to instate IP blocking strengthen the capability of protecting user accounts.

Unified Billing and Dual-Currency Operations. A unified system for receiving payments via reliable payment service provides for all the requirements of the platform. As blockchain is a relatively new technology and has not yet become widely used, dual currency operations are a crucial instrument for every game. Developers can receive payments for their games in a usual fiat currency as well as in ABYSS tokens, the latter providing a range of advantages for all participants of the platform.

Customer Support Service. An around-the-clock, support service enables the reduction of natural user outflow. The deeper the support service is integrated into a game, the higher

the loyalty of its players is. We already provide a bilingual, 24/7 user support service for Destiny.Games projects. If needed, the offering of languages will be expanded. We propose three levels of integration for projects: basic, advanced and the complete package, whereby employees of the support service can answer questions regarding the particular project.

Transparent System for Statistics and Reporting. Start-up developers are not always able to compile and interpret game metrics so that they can use the obtained information to develop their game projects. The metrics that are most in demand in the video game industry, as well as convenient forms of reporting, are presented for every project immediately following integration. We compile fundamental events, interpret them and then report our analysis and forecasts to the developers. Uniformity in compiling data from the projects excludes discrepancies in the statistics. For every project, ARPU, MAU, LTV and other metrics are considered similarly.

Forum. A common space for communication among all participants of our video game ecosystem. We plan to create our own common forum for all games of the platform where each user can select the themes he/she is interested in.

In addition, the forum will include an area for communication between developers and contractors where issues can be resolved, such as searching for localizers and marketing experts or hiring employees in a different country. Players can directly communicate with developers and offer their own services. The Abyss plans to verify contractors so that the selection of partners for collaboration is maximally productive.

4.1 Developer's Personal Account Section and Personalization

A particular developer's personal account section will comprise of two areas: public and private.

The private area is to contain reporting on all the developer's games, current advertising offers and profits from referral programs. The private area is to serve as a center for managing the developer's games, traffic and audience.

The public area is a unique page for the particular developer. It can be personalized to the level of a corporate site, consisting of news, announcements, competitions, voting, and messages.

4.2 Player's Personal Account Section and Personalization

MMO games, our key focus, are unique in their exclusive socialization. Viral connections between players and MMO projects are so strong that local game communities stick together even after the closure of a particular project, opting to search for a new way to play together.

This means that players certainly need personalized pages to maintain a presence and communicate on the platform. A particular player's personal account section provides information about all his/her financial operations, current balance and advantageous offers

for setting up games, an opportunity to bound a personal Ethereum wallet, order the ABYSS tokens transfer, obtain full statistics for all referrals and motivational programs, as well as current rates for rewards for game achievements, functionality of direct communication with referred players and friends, and much more.

The public area of the personal account section is a place for personalization and self-expression, communication and publication of various achievements.

5 Statistics System

The current systems for statistics on the majority of digital distribution platforms assess only payments and the behavior of traffic upon entering the project. All the other metrics are usually left behind the scenes. Experienced developers understand the significance of statistics and analysis for a game project, where even a change in the icons of the game store can considerably change payment conversion.

5.1 System Description and Terms

An MMO project cannot exist without an audience that can be considered traffic before entering the game. The behavior of traffic is measured from the appearance of advertising material until exiting the game. Every step on the trajectory for user retention is fixed with various conversions that a particular developer can optimize to drastically reduce expenses for traffic.

The realization of game project analysis can amount up to a third of the programming code. An effective system of statistics and analysis requires a profound integration into the project, where every action by a user is recorded in a database.

All video game projects are unique: the game's economics, motivation systems, game tasks, items, etc. Furthermore, the majority of projects have common metrics, based on fundamental events inherent to such projects, compiled and interpreted for the platform and then sent to the developers in the form of convenient tables with breakdowns and forecasts.

Everything listed in the table below has been realized by Destiny.Games, is being actively used and continually updated according to the needs of the video game market. Simple integration and a maximally-detailed analysis of player behavior are presented to every developer immediately after connecting to the platform.

<u>Term</u>	<u>Description</u>
General Statistics and Forecasts	Brief report that presents minimal data. The number of registrations and the sum of payments by day. Results, data for the past month and current forecasts.
Registrations Report	Complete statistics on the project's incoming traffic, both from outside the framework and from the internal system of offers. Impressions, clicks, payers, level transitions, conversions, division by cohort, etc.
Basic Metrics of the Project	Consolidated report about everyday behavior in regard to the game. Number of those online per day, ARPU, ARPPU, MAU, DAU, ADAU, CCU, number of payments, percent of payers, number of payments per user (per day/week/month), filtered by cohort, grouping, etc.
ROI Report	Assessment of the recoupment of traffic brought in during a certain period, with a possibility of filtering by cohort in short and long periods from the moment of each registration.
Partners Report	Assessment of the quantity and quality of traffic, with an opportunity to simultaneously compare the behavior of traffic from each partner or offer.
ROI Report (Calendar Basis)	Assessment of the recoupment of traffic with reference to calendar periods with simultaneous evaluation of ROI per partner.
Report on Bringing Back Users	Crucial report for evaluating marketing activities aimed at bringing back users. Allows you to compare the number of returned users for fixed periods after their return and see the users' subsequent payments.
Outflows Report	Enables assessment of natural losses of the audience.
Retention	Classic report on retaining users.
KPI Report	Enables assessment of the quantity of traffic according to various conversions by cohort and period.
LT, LTV, Forecasts	Report that allows you to record, in general terms and according to cohort, the average lifetime of an LT player, as well as the total revenue per user over the LTV lifetime, and form forecasts for periods of several days or more.
Specialized Reports	Certain game categories, such as sessions or collections, may require special reports currently being developed.
Additional Reports	In the second year of the development of the platform, we plan to create a function of customized reports for each developer.

6 Economics of The Abyss Platform

We are issuing a limited volume of ABYSS tokens. 1/3 of the platform's commission from the internal CPA Network and the auction transactions will be burnt.

6.1 Priority of ABYSS tokens

For the purposes of popularizing ABYSS tokens, we introduce the additional bonuses:

- Payments to developers as a share of payments in ABYSS tokens is performed by request or automatically;
- The cost of purchases in ABYSS tokens is lower;
- The internal system of offers among developers functions only in ABYSS tokens;
- All referral and motivational programs are calculated and paid out only in ABYSS tokens;
- Auction of in-game and platform items is conducted only with the use of ABYSS tokens;
- The syndicates system relies on ABYSS tokens only;
- The rewards for content creation are calculated in ABYSS tokens;
- ABYSS tokens can be freely transferred to friends within the framework of the platform.
- When paying for game purchases with ABYSS tokens, users are granted a discount at the expense of the platform. This makes ABYSS token more advantageous than fiat currency.

6.2 Distribution of User Payments

After deduction of payment system commission and taxes, the game developer receives 70% of each payment, while the platform receives the rest 30%.

6.3 Crypto Reward Ecosystem

6.3.1 Referral Program

1/3 of the platform's net revenue from user payments is distributed to referral program as follows:

TABLE OF REFERRAL INCOME	
4%	from the 1 st level referral payments
2%	from the 2 nd level referral payments
2%	from the 3 rd level referral payments
1%	from the 4 th level referral payments
1%	from the 5 th level referral payments

The user is considered a game referral if the game is the player's first game on the platform, and the player is not a referral to anybody yet. The game developer receives a share from all transactions made by this player and his current and future referrals (5 levels in total) in any other game on the platform.

The developer receives an additional percent of all payments not only by the player, but by all those referred up to five levels deep in any other game on the platform.

Every game that brings in at least one new loyal user of the platform. The one, who brings the friends in, forms a network of referral payments from all other games on the platform.

The player receives a percentage of the payments by all the platform's users whom the player brought in through a referral link up to 5 levels deep. The players brought in begin to form their own referral chains. If an invited player comes into the platform on his or her own – that is, not by any kind of referral program – that player becomes the founder of his or her referral chain.

F2P MMO games are a special type of games in which players spend hundreds of thousands or sometimes even millions of dollars¹¹ in order to show up. According to the six degrees of separation theory¹², by which any two people on the Earth are separated by no more than five levels of common acquaintances, each player on the The Abyss platform has the chance of landing such a big fish in his or her referral network. The fortunate combination of circumstances will allow for the capture of a whole pod of whales¹³.

¹¹<http://toucharcade.com/2016/10/14/free-to-play-whales-are-now-boycotting-spending-in-games-to-get-changes/>

¹²Six degrees of separation is the idea that all living things and everything else in the world are six or fewer steps away from each other so that a chain of "a friend of a friend" statements can be made to connect any two people in a maximum of six steps.

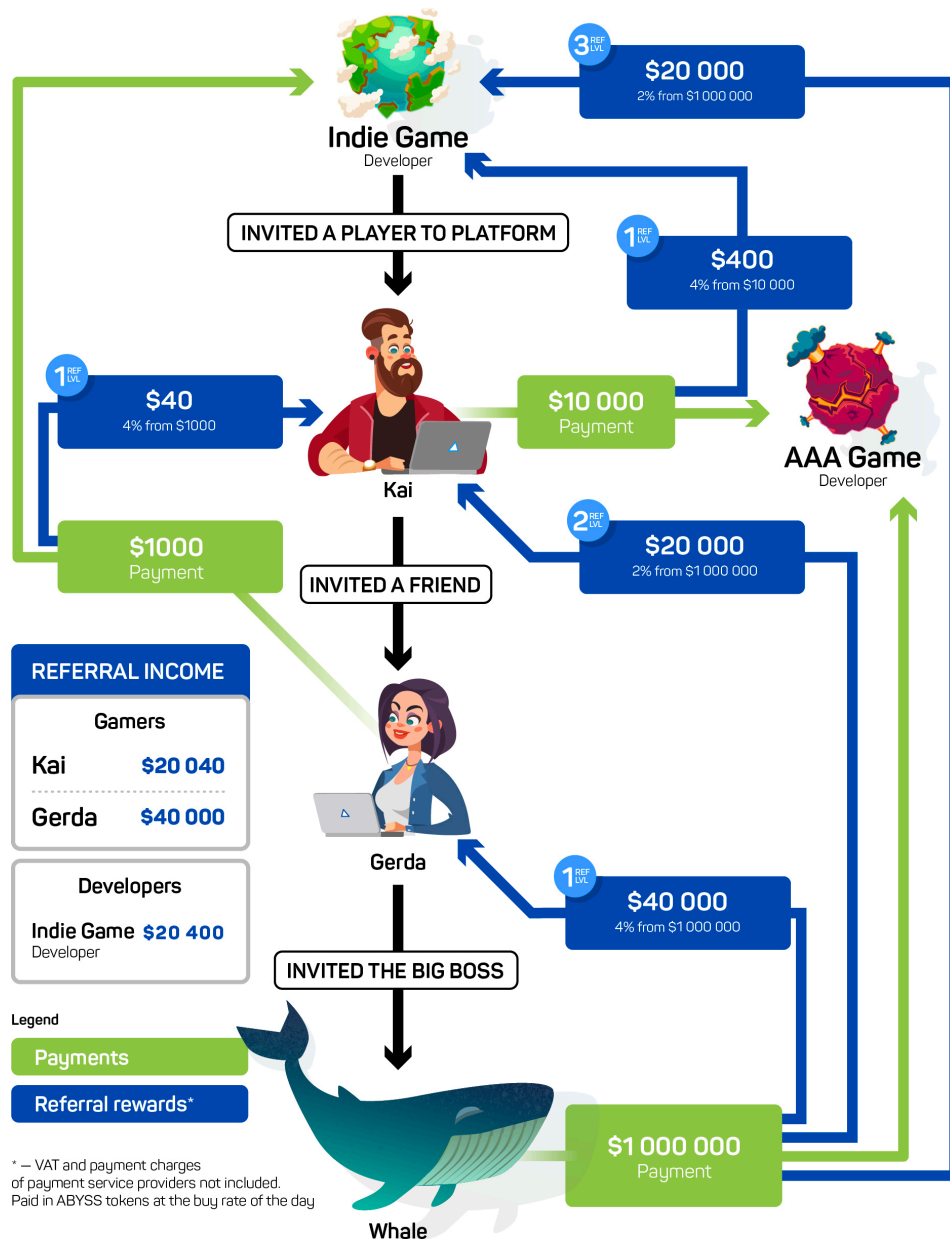

¹³<http://www.adweek.com/digital/infographic-whales-account-for-70-of-in-app-purchase-revenue/>

With the help of the targeted promotions of individual developers based on payments from referrals from other games, the general payout to developers in calculation of income from the game can exceed 100%.

How it Works

When The Abyss platform receives a payment, 70% goes to the game developer and the platform retains the remaining 30%. 1/3 of our income is distributed to our referral program. Referrer receives 4%, 2%, 2%, 1%, 1% from payments made by his 1-5 level referrals.

Example: Gerda pays \$1000 to Indie Game. Kai, for whom Gerda is the 1st level referral, receives 4% from \$1000 = \$40.

6.3.2 Motivational Programs

Motivational programs are financed from Reward Bank, formed by:

- Remainder of the budget from interrupted referral chains;
- Reserve (will be used to provide motivational rewards to players to accelerate the ecosystem growth at the early stage of platform operation).

The preliminary distribution for the Reward Bank is planned as follows:

- 60% —Game achievements (personal and collaborative)
- 25% — Syndicates (Masternodes)
- 15% — Content creation

After the Reserve is spent, and if the funds coming from interrupted referral chains are insufficient for financing the motivational programs, The Abyss team can, at its sole discretion (but not before January 1, 2020) change the conditions of receiving payouts from 2-5 referral levels, as well the percentage assigned to financing of the referral program.

6.4 Game Achievements

MMO projects entail long-term activity in which the player can be retained for years. One of the ways of retaining players is through game achievements. The Reward Bank is regularly used to make payments to all users for personal game achievements. The size of the payouts for each personal achievement is proportional to the income of the particular game and depends on the overall number of achievements at that level of rarity performed on that particular day throughout the entire platform. The size of a reward for achievements and activity outside a game (syndicates and content creation) depends on the daily size of the Reward Bank.

6.5 Syndicates (Masternodes)

Syndicates is a mechanism for bringing together players who may not be connected in a single game, and an additional method of monetizing the social activities of the platform based on blockchain technology. A syndicate is a collaborative game activity enabling receipt of an additional income depending on the rating of the syndicate. The syndicate's rating is influenced by three indicators:

- Number of ABYSS tokens in the syndicate's account;
- Shelf life of each lot of tokens;

- Personal rating of each participant in the syndicate, figured from the sum of motivational accruals.

Special badges, the types of which depend on the rating of the syndicate, are regularly accrued for each participant. All the badges in the platform are redeemed from the budget of the Reward Bank.

Furthermore, the syndicate's rating influences the personalization of an individual user page (configuration, elements of socialization, rank, emoticons and emoji, additional options, including the weight of a like or unlike, and much more).

6.6 Content Creation

There are many mechanisms for sustaining the interest in a game and shaping public opinion about it, such as articles, streams, reviews, guides, fan art, videos and stories. Everything can be evaluated and rewarded via the platform or users themselves thanks to blockchain technology. There are two options in the interface for publishing any material:

- Like/Unlike, which can be monetized;
- Opportunity to receive ABYSS tokens from other users in the form of rewards for a quality content.

The platform assesses each publication of content as a ratio of likes and dislikes. As such, the rating of a user that evaluates a publication is important. The user's like with a high rating carries a lot more weight than a like from a player who has recently registered.

Based on the assessment, the author of a publication enjoys special badges of various denominations that must be combined into a collection. Once a day the platform purchases presented collections, based on the share of the daily Reward Bank. Any user can freely buy or sell any type of badge at an auction on the platform.

6.7 Auction

An auction is a way to buy or sell game components or non-play badges of various types for ABYSS tokens. The commission for transactions is minimal and is determined as following: 3% of the sum of the transaction goes to the platform, 5% to the game.

7 Internal CPA (Cost Per Action) Network

On The Abyss platform, developers get access to a universal advertising account for bringing in targeted traffic (interested in the game) with the following possibilities:

- Offer one's own traffic to other games;
- Purchase traffic from other games via clear targeting and offers;
- Get external traffic, connecting leads to the internal system for statistics.

For internal traffic, a 10% commission in ABYSS tokens is charged. Tools for work with external traffic are presented for free.

Regarding its function, the internal CPA Network appears like a window with accessible options of offers that are presented by developers, proposing that other games and individual players take part in working with the traffic. Each game independently determines the type and targeting of its offer.

7.1 Link Referral System

After the launch of any project, an active advertising campaign with various depths of coverage is commenced. This utilizes an advertising network, bloggers, media and placements on specialized resources, etc.

To simplify things for the developers and compile analysis of the traffic of projects in one place, we offer a classic system of referral links generated by the system. Developers can fully analyze their advertising campaigns, including ad placements in other resources. A complete section of metrics is translated into the system so that all the necessary indicators (including ROI) are considered for each project. Additionally, developers have access to options for making external offers with clear KPIs to automatically calculate metrics.

Within the framework of the internal system of offers (CPA Network), there will be a mechanism for developers to publish offers through which they purchase traffic on the platform as well as from other projects or players on various terms. Developers can set requirements for the traffic, such as game settings, ability to pay, rating of players on the platform, and social activity, and select the type of advertising offer and load the advertising materials. It is possible to name the price for each offer in only ABYSS tokens. A project interested in the offer can in turn share traffic that is no longer pertinent to the project, such as when someone has not entered the game for a long time or has not made payments

7.2 Motivated Traffic

Motivated traffic is not so effective given that the conversion of motivated traffic into active players is rather rare. Marketing experts invent complicated goals for motivated offers on the assumption that the potential player will be drawn into the project as the task proceeds. Complicated offers, of course, raise the conversion rate but are inferior in quality to most types of

traffic. One of the reasons for this problem is that everyone can participate in a motivated offer without any particular interest in video games.

Within the framework of the internal system of offers, game goals can be fulfilled by players, meaning a higher conversion rate for active players according to achievements of paid targets.

7.3 E-mail Promotions

For complete functioning of the platform it is necessary to have its own e-mail service. In the internal CPA Network developers can order targeted e-mails to be sent to the users presented by another developer. Personal user information is not provided to the receiving developer.

7.4 Media Advertising

Developers can order content media advertising. Several advertising positions are foreseen for these purposes: banners on personal pages, forum sections branding, and non-standard advertising formats.

7.5 Content

Developers can order content creation within the framework of the internal system of offers according to a specialized brief or pay ABYSS tokens to the author of an interesting publication directly within the framework of the platform.

8 Roadmap

Q3 2008. Founding of Destiny.Games (video game company).

Q3 2016. The idea of a state-of-the-art game portal creation.

Q2-Q3 2017. Testing the opportunity of blockchain technology integration into the new concept.

Q4 2017. Presenting the concept of The Abyss – a new generation digital distribution platform.

Q1 2018. Presenting the concept of DAICO¹⁴ – an innovative fundraising model.

Q2 2018. Introducing The Abyss platform prototype. Formation of The Abyss LTD, a company registered and incorporated in Malta, and the issuer of the ABYSS token. Conducting the Token Sale. Commencing The Abyss platform development. Presentation of concept of The Abyss to game developers.

Q3-Q4 2018. Active phase of platform development. Legal and financial preparation for the launch of the project. Partnership agreements with game projects.

Q1 2019. The first version of the platform with the startup game package. API for project integration. Unified bi-currency billing; Unified system of authorization. The first integration of multilevel referral programs.

Q2-Q4 2019. Active development of the platform: Expansion in the number of connected projects; Introducing the personalization and socialization systems; Introducing the detailed reporting system; Introducing the internal CPA Network.

Q1-Q4 2020. The expansion of platform functionality: Motivational programs; The ability of content generation and evaluation; Auction; Syndicates; Joint game achievements.

2021+. Crowdfunding platform. Further extension of the platform.
